# DIRECTIONAL DRILLING SERVICES

Boart Longyear has more than 125 years of experience in drilling, safe operations, equipment design and engineering, and manufacturing the highest quality drilling tools. As a leader in innovation, we continually develop and perfect unique drilling methods, including directional drilling to meet all your drilling needs.

By combining our global team of directional drilling experts with our diverse fleet of rigs and equipment, we meet even the toughest project requirements. In order to deliver the best solution for the job, our team of professionals work to understand your project objectives as well as the ground and site conditions. We use that information to recommend the best solution for your project to meet the project requirements and exceed your expectations.

## Count on Boart Longyear to provide:

- A one contractor directional drilling solution.
- Straighter, more precise holes with fewer severe corrections.
- Professionally trained crews with in-depth experience and safety training.
- Quality core for accurate information.
- A diverse fleet of rigs.
- Adaptability for changing projects, environments, and ground conditions.
- Exceptional, consistent, and reliable service.
- Global service and supply facilities.

## TECHNICAL EXPERTISE

Boart Longyear offers locally trained and certified crews with unparalleled knowledge and experience. The quality of our crews make the difference. Boart Longyear directional drillers have extensive technical knowledge about ground conditions, techniques, and tooling to achieve optimum results.

We offer directional motors, steering tools, and pumps for any directional drilling project. Boart Longyear uses advanced technology for monitoring and reporting and accurately steering to target. We use that information to provide high-tech hole modeling. When you need to hit specific targets, trust Boart Longyear.
